

The Complete Practice Management Solution

PatientRecords

ClinicalSupport

E-Commerce

The Benefits

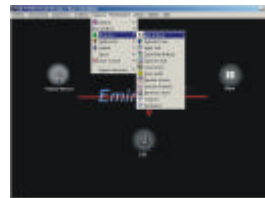

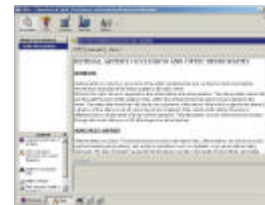

Today, the needs of the practice are more advanced, requiring powerful systems that are easy to use.

The benefits of using Eminance in your practice are vast. They range from the e-commerce facilities that reduce operational costs, through to dramatic cash flow improvements through automated tasks. Because it is adaptable for almost all practice types, and verifies data before it is committed, Eminance is sure to minimize risk while maximizing workflow. The end result is better patient management through easily available information.

Client Server

Developed in response to the practice needs, Eminance is developed for speed and power.

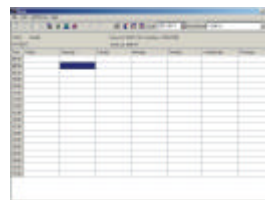

Client server means that you never have to upgrade your workstations; that power failures will not damage the data; that networks do not slow down your processing, and that your data is always secure. It's no wonder that organizations such as Boeing, Nokia and NASA use the same database as we do. Its extremely low maintenance and the ability to handle mass amounts of data over networks makes it the ideal solution for the large practice, while its bulletproof reliability and low cost makes it ideal for the small practice.

Backup and Support

Distributed and backed by a national dealer network, ongoing support and peace of mind are guaranteed.

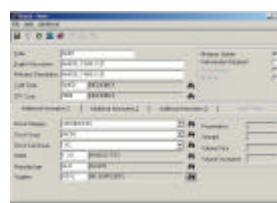

To ensure you always have the system that meets your requirements, our systems are never sold, but licensed for use. It's a guarantee that you are always up and running and the assurance that HealthFocus is backing you. Enjoy peace of mind in the knowledge that program updates are free, that access to our call centre and help desk carries no charge, and that expert advice is readily available. Your investment in Eminance ensures constant and continual backup and support.

Capable

As the largest independent software house in the country, you can be assured of the features.

Eminance is a very capable program, covering all facets of the practice; from clinical records through to specific medical, general, dental and optometric requirements. Designed in conjunction with practitioners, it ensures that it does what you want to do, when you want to do it—with an undisputed level of accuracy. Emphasis is placed in practice management mechanisms to improve and maintain a positive cash flow, systematically improving your profit potential.
